Introducing the Mozart Grand *Symphony Edition*

It is nearly impossible to fully express the impact Wolfgang Amadeus Mozart has had on the identity of our home, Vienna. This importance is the same with us at Vienna Acoustics and the model loudspeaker, now in its third generation, which we have chosen to name for this most famous musical innovator.

Taking into full account the importance Mozart represents, we have recreated the Mozart Grand with refinements effecting virtually all critical components. One area we will not change is how and where we build each piece. For more than twenty years each loudspeaker we create is hand crafted in Vienna, Austria with only the finest components and expertly crafted, custom cabinetry.

Beginning with our longstanding belief that the foundation of a proper loudspeaker design lies within the quality of its drivers, we have worked extensively on building tighter and tighter tolerance drive units. It is with this constant improvement in our driver production and testing that we found the first ways of making improvements to this model. In addition to these difficult improvements in driver production, we have replaced the second woofer with a new Spider-Cone™ woofer.

While it would have been possible to complete this new product with these improvements, we decided to continue researching ways of improving the crossover as well. The final sonic improvements as a result of these collective changes are greater clarity, speed as well as greater bass extension without giving up any of the famed musical quality and rhythm inherent in all our designs.

The final reward for this painstaking effort is presented here in our new Mozart Grand Symphony Edition. This new evolution sets the stage with new levels of scale and authority.

Vienna Acoustics – The Art of Natural Sound™

Technical Information

Impedance	4 Ohms
Frequency Response	30Hz – 22kHz
Sensitivity	90dB
Recommended Amplifier Size	30 – 200 Watts
Tweeter	1.1" Hand Coated VA Silk Dome
Mid-Woofers	(1) 6" X3P (2) 6" Spider-Cone™ X3P
Bass System	Bass Reflex
Bass Function	Impulse Optimizing QB 3 (Quasi-Butterworth)
Crossover System	Two and a Half Way
Crossover Components	MKP Capacitor 1% Tolerance Coils 0.7% tol., Air Coils Metal Film Resistors 1% Inductance Free
Weight per Pair	116lbs/52.6kg
Dimensions (W x H x D) inches	8.5" x 38.25" 13.5"
Dimensions (W x H x D) mm	216mm x 972mm x 343mm
Finishes	Cherry, Rosewood, Piano Black and Piano White
